

Osama Nisar

Full Stack Laravel Developer

Passionate about building complete web solutions that are smooth, scalable, and easy to use. I enjoy turning ideas into real products by working across both the frontend and backend. Always looking to learn more and take on new challenges that help me grow as a developer.

WORK EXPERIENCE

Backend Engineer Rev9 Solutions

06/2023 - Present

On-site

Achievements/Tasks

- I have consistently made meaningful contributions to my employers by delivering impactful results across diverse projects. Throughout my career, I have continuously enhanced my skills, transforming theoretical knowledge into practical expertise. My commitment to ongoing learning ensures that I stay current with evolving technologies and consistently apply best practices in real-world scenarios.

PROJECTS

PrinceMotorsUSA (PHP | Laravel) (10/2023 - 12/2023)

- Prince Motors is a commercial truck and equipment dealership based in Southern California. I was responsible for developing the backend of the platform using PHP and Laravel, with a focus on building and maintaining the admin panel to manage inventory across multiple categories efficiently.
- **Application URL:** <https://princemotorsusa.com>

VYACARE (Laravel | VueJs) (01/2024 - 05/2024)

- VYACARE is a software platform designed to streamline nutrition counseling services. I integrated calendar functionalities including Google Calendar, Zoho Calendar, and Outlook Calendar to enhance scheduling efficiency. Additionally, I implemented Zoom integration, enabling seamless virtual consultations between doctors and patients directly within the VYACARE platform.
- **Application URL:** <https://vyacare.com>

OnTime (Laravel | NextJs) (05/2024 - 10/2024)

- OnTime is a logistics platform where I integrated two major dispatch services—Royal Mail and DPD—via their respective APIs. Prior to this integration, the client managed these services separately, leading to operational inefficiencies. My solution streamlined the process by enabling centralized and seamless dispatch management directly within the OnTime platform.

EDUCATION

BS in Computer Science University of the Punjab

09/2019 - 06/2023

3.60 CGPA

Courses

- Object Oriented Programming
- Data Structure and Algorithm
- DataBase Management
- Software Quality Assurance
